

Reflecta Whitepaper

1. Introduction

Reflecta is a DeFi ecosystem built on Binance Smart Chain (BSC), combining passive income, NFT-based reflections, and sustainable tokenomics. Our mission is to reward holders with real yield through a fair and community-led structure.

2. Vision & Mission

Vision: To be the most sustainable and rewarding reflection-based ecosystem in DeFi.

Mission: Empower users with transparent, inflation-free passive income opportunities through tiered NFTs, fair tokenomics, and a DAO-governed treasury.

3. Core Utilities

RFX Token: Reflecta's native token used for governance, staking, and reflections.

Reflecta Keys (NFTs): Tiered NFTs (x1, x2, x3) that boost reflection rewards.

DAO Treasury: Community-governed wallet to fund growth, buybacks, and LP.

GEM Token: Secondary token earned via staking; future use for upgrades, fusion, and utilities.

4.Tokenomics

Total Supply: 30,000,000 RFX

Reflecta's tokenomics are designed for sustainability, reward flow, and long-term protocol health. Each allocation is optimized to support staking, ecosystem growth, and community incentives.

Token Distribution:

10% — DEX Liquidity (Locked)

Used to create the initial PancakeSwap pair, ensuring a stable launch price and trading experience.

25% — Staking & Yield Pools

Allocated to incentivize staking and long-term holding. Rewards are distributed to users staking RFX and NFTs.

20% — NFT Reflections Reserve

Dedicated pool that sends BNB reflections to NFT holders based on rarity (x1, x2, x3 boost).

12% — DAO & Growth Reserve

Used for community-approved proposals: ecosystem growth, buybacks, liquidity reinforcement, or GEM liquidity support.

8% — Team (Vested over 24 months)

Fully locked at launch, linearly unlocked monthly to ensure long-term commitment and no early dumps.

5% — Milestone Burn Reserve

Reserved for manual burns tied to project milestones like total users, trading volume, or TVL goals.

10% — Strategic Partners / CEX / Cross-Chain

Used for exchange listings, bridges, and partnership incentives that expand Reflecta's reach.

10% — Airdrops & Community Rewards

Deployed through quests, fusion bonuses, OG NFT holders, social competitions, and governance incentives.

5. Tax System

Buy Tax – Total 5%

1% Liquidity

1% Treasury

1% Burn

2% Reflections (in BNB to NFT holders)

Sell Tax – Total 15%

1% Liquidity

1% Burn

3% Treasury

2% Marketing

8% Reflections (in BNB to NFT holders)

6. NFTs: Reflecta Keys

Total Supply: 7,777 NFTs

Tier 1: x1 boost – 60%

Tier 2: x2 boost – 30%

Tier 3: x3 boost – 10%

First Wave: 200 NFTs only. Early adopters benefit from max share of launch reflections.

7. Staking System

Stake RFX or RFX+NFT to earn enhanced yield

Unlock GEM token through staking

Higher rewards for longer locks & rarer NFTs

Early APR bonuses for community builders

8. DAO & Governance

NFT holders vote on key treasury decisions

Proposals for buybacks, LP expansion, utility funds

Voting power scales with NFT tier and staking amount

9. Launch Strategy

No Presale. 100% Fair Launch

Liquidity fully locked on PCS

Token launches once 200 NFTs are minted

Fair pricing, anti-bot deployment

10. Roadmap Preview

Q1

NFT Mint

Token Launch

Reflection Distribution

Staking & Dashboard Live

Q2

DAO Voting

GEM Launch

Reflection Claim Portal

Marketing Push

Q3

NFT Fusion

GameFi Utility

CEX Explorations

Q4

Cross-chain Bridge

Ecosystem Expansion

Reflecta x GEM Integration

11. Security & Transparency

Liquidity locked via 3rd-party locker

Team wallets vested via smart contract

DAO-controlled treasury

Scheduled audits pre-DEX and post-launch

12. Conclusion

Reflecta redefines DeFi yield by combining utility-backed NFTs, community-driven governance, and sustainable tokenomics. With no presale and a low starting supply, early adopters have unmatched upside potential.
